

LARGE-DIAMETER FORMAT

High Flow Filters

AI-generated product-family illustration. Final appearance varies by model.

Construction	Published product concept
Format	152 mm (6 in) diameter, coreless, single open end
Requested length	60 inches (1524 mm); confirm the model and housing fit before ordering
Medium / flow direction	Pleated media; inside-to-outside filtration
Selection	Confirm media, micron rating, length, connection and housing compatibility
Duty	Flow, pressure and temperature require model-specific confirmation

Typical duties include RO pretreatment, process water and power-plant condensate filtration. Select a compatible housing and confirm cartridge performance against the required flow and outlet quality.
